Hi Leslie. Great to hear that the GIS group is ready to assist. Karrie is off today so I'll reach out to Michelle to schedule our next meeting with Jason Myers.

Can you schedule a meeting with Michelle and Jason for early next week? See Dave's email below. I'd like to start the dialogue on what we can do to help. To be honest, I'd like to offer some suggestions on

Ex. 5 Deliberative Process (DP)

We need to keep Rick, Samantha, Chad, Mark Ferrel, and Dave on everything.

Thank you,

Leslie

Leslie

We stand ready to provide analytical and GIS/data analytics support. You may extend that support to WV now. We may also be able to provide field sampling and sample logistical support from our Wheeling office.

Dave

Thanks Leslie - the GIS mapping sounds like a terrific idea.

My bad – we need to include Chad and Mark on any additional meetings with DHHS and CWB.

Importance: High

Hi all,

Paul just asked me to connect with you to coordinate discussions as soon as possible with DHHR to start working with Jason. I know they need to formally reply to the order, but we also want to keep this from turning into another venting session. I think we can offer some good advice to begin with, including helping Jason with the list of homes and prioritizing that.

Please let us know when we can start reaching to Michelle on this and keep this moving.

Karrie and Alysa have compiled a list of areas where we can likely assist. We don't have all the details yet, but this is what we are looking at:

- Technical support
 - Ongoing support regarding LCR requirements
 - Additional review of public education documents
 - LCR sampling plan (already provided guidelines/examples to WVDHHR)
 - EPA to review and provide feedback
 - LCR materials evaluation – EPA to review and provide feedback
 - Mapping assistance – EPA could generate a GIS layer of CWB's service area and overlay existing layers with school information, etc. Then use the map to indicate where LSLs exist or service lines of other materials have been identified as well as where lead sampling has been done or will be done
- Laboratory support – lead sampling/analysis. Exact needs are yet to be identified; EPA's lab stands ready to assist
- Corrosion control support - EPA's corrosion control expert is in contact with CWB
 - CWB to share a LCR pipe sample for evaluation
 - Lead sampling methods
 - LSLR identification methods
 - Expanded drinking water lead assessment
